

For Immediate Press Release

The Ionia Conservation District will be hosting a series of Information Sessions in local communities to provide information about an initiative that is underway to install recycling drop-off stations in key locations throughout the county. Sessions will include a time for "listening to learn" among community participants, where everyone will have an equal opportunity to provide input toward this exciting initiative. Conservation District leaders encourage citizens to attend sessions closest to their residence and look forward to providing this fact-based series.

Registration is required to ensure a meaningful and relevant environment is created for all sessions. [REGISTRATION LINK](#) or at www.ioniacd.org
