STREET IMPROVEMENTS

Center Street

In our ongoing efforts to maintain Village streets, we have scheduled the reconstruction of Center Street, south of Mill Street. This project includes the replacement of Village utilities, as well as replacement of the asphalt.

Contractor's equipment and barrels/cones will be on site by the end of this week. The project will start on Monday, August 3rd, with substantial completion expected on or before Friday, October 23rd.

The street will be closed to thru traffic (other than emergency vehicles) during the entire project, however, residents of south Center Street will have access in/out at all times.

On or around August 12th, the intersection of Mill Street and Center Street will be closed to thru traffic (other than emergency vehicles), for 1-2 days, while utilities are being connected.

We thank you in advance for your patience and understanding, should you experience any inconvenience as a result of this project. We continually strive to improve and maintain the quality of Village streets on your behalf.

**IF YOU HAVE ANY QUESTIONS OR CONCERNS
